Philadelphia, Pennsylvania 19107

**SUBJECT:** Telephone Conversation with Jane Sulima

**DATE:** MAY 08 1989

**FROM:** Michael Towle, Hydro. *M*  
PA CERCLA Remedial Enforcement Section (3HW12)

**TO:** File

On April 28, 1989, Jane Sulima contacted me to inform me of the results of her consultant's observations of her well sampling. The results are as follows:

pH 4.46  
Temp. 10.6  
Cond. 119

Previously Jane said that her consultant, Marvin Lewis, found little, if any, problem with the methodology and equipment used by Fred C. Hart to analyze the above parameters. I requested copies of Mr. Lewis' field notes. Jane said that she would send the field notes to me.
